PONN BRIDGE (1874)
(Also called the Humpback Bridge and Gheers Mill)

Unfortunately, this bridge was destroyed by arson in 2013. However, its massive sandstone abutments are still an impressive sight.

In Wilkesville while traveling State Route 160, across from the village square and school yard, turn onto County Road 8. Travel about 2 1/2 miles to a wooden Vinton County sign. Turn right onto gravel road. Travel about 3/4 mile, take left fork in road, go down hill then travel about 1 1/4 miles on this road to the bridge. Travel on about 4 1/2 miles to State Route 160 near Ewington.

Covered bridge drawings by Lorraine Radune of McArthur, Ohio.

For more information, contact the Vinton County Visitor Center at 1-800-596-4459.
COX BRIDGE (1884)
Located about 9 miles north of McArthur, immediately off State Route 93 N, just south of the State Route 56 and 93 intersection.

ARBAUGH BRIDGE (1871)
(Also called Aikins or Eakins Mill)
From Athens, traveling the Appalachian Highway, State Route 32, turn right onto County Road 43B (just before County Road 38). Travel about 3/4 mile. Turn left to get to bridge. This is currently the only bridge in Vinton County that can still be driven through.

BAY BRIDGE (1876)
(Also called TINKER)
Moved from its original site in 1967 (near Lake Rupert) to the Vinton County Junior Fairgrounds which is 1 1/2 miles north of McArthur on State Route 93.

MT. OLIVE BRIDGE (1875)
In Allensville while traveling U. S. 50, turn north onto County Road 18. Travel approximately 1 1/2 miles. This bridge is located over Middle Branch Salt Creek on a township road which turns off County Road 18 to the east.
